

DANCE eJAY 4

eJay is a very popular software package used in many schools for Key Stage 2-4. The latest recommended version is Dance eJay 4 (which supercedes eJay 2 & 3). With the introduction of a special network edition, it can be installed in a computer suite with ease.

Do not be tempted to buy eJay 5 or 6 for school, as they require a high specification machine including a Pentium 3 Processor.

Dance eJay 4 turns your PC into a 48 track recording studio with over 5000 original and professionally edited samples to choose from covering Trance, Tech House, Garage, Latin and Dance Hall.

All you have to do is simply drag and drop the samples on the grid and you will be creating your own music in minutes!

All eJays work in a similar method, but the latest versions offer more opportunities to manipulate the sound and have added extras to enhance the music with light shows, video animator and a voice generator.
